

ENERGY SAVINGS TIPS

1

Recommended R-value in the ceiling area is R-38. R-value is a measure of resistance to heat flow through a given thickness of material. The higher the R-value, the greater the resistance. Recommended R-value in the floor area is R-19.

2

Open the blinds in the winter to allow the sun to heat your house. In the summer, use blinds or drapes to help keep your home cool.

3

In the summer, restrict the use of heating appliances (cooking, drying, dishwashing) to the early morning or evening hours.

4

Only run the dishwasher or washing machine when you have a full load.

5

Use cold water instead of hot water whenever possible.

ENERGY SAVINGS TIPS

6

Install a programmable thermostat. It can save you as much as 10% on energy costs every year.

7

Don't block indoor air supply and return vents with furniture or other objects.

8

Don't overheat water. Set the thermostat on your water heater to 120 degrees.

9

Use energy-efficient LED bulbs.

10

Unplug electronic devices and chargers when not in use.

**SAVE ENERGY.
SAVE MONEY.**
